# DAILY STATUS OF POULTRY FARM

This project content represent that, supervising daily status recording, which includes growth, weight and death of poultry. The main perseverance of this application development is to reduce man power and to avoid daily travelling expenses etc.

Using this application development the following item can be verify by the business concern: [User ID- Poultry Owner & Admin ID – Issuer]

- Status of poultry farm can be verify at any time in their own respective location.
- Without any confusion the expected delivery date of poultry can be calculated from the issued date to target date.
- The issuer can compare with other poultry farms and they can assess the exact best performance and can finalize further prompt business.

**FEW DISADVANTAGES OF PRESENT WORK:**

- Manual date calculation may get wrong

- Manual Growth & Death Calculation may get a wrong calculation

- Petrol expenses for super wiser

- Salary for Super wiser

- Payment through Super wiser may not be an exact.

- If super wiser unable to come for a survey, we couldn't update the status to the dealer.
